

## **William Harvey Research Institute (WHRI) Work Experience Programme Monday 24<sup>th</sup> - Wednesday 26<sup>th</sup> October 2022**

Each day will run from 9:30am-5pm

The October 2022 Work experience programme will be run as an in person event and will include the following activities:

- Engage with clinical trials patients, taking their patient history and learn about their experiences of being a participant in a clinical trial
- Hands on practical laboratory experience
- Q&A session with undergraduate students - hear about their course experiences and university life
- Cardiopulmonary Resuscitation (CPR) and Automated External Defibrillator (AED) training
- Demonstrations of clinical measurements of blood pressure, blood flow and ultrasound of the heart
- Shadow PhD students and post doctoral researchers - learn about their research and lab techniques
- Talks from lecturers/professors - The talks will be from basic scientists and clinical researchers and will cover the individual's educational background, their career to date and an overview of their current research. This will give an insight into career progression from a scientific or a medical background
- Barts Charity talk - Learn how, through their funding schemes, research and innovative healthcare initiatives which improve patient care, are supported
- Genomics England talk – Discover the importance of DNA sequencing
- QMUL admissions talk - Learn about the undergraduate courses that QMUL offers

Programme is subject to change
